format professional quality Cutter for plastic and rubber pipes

Pipe cutter **for plastic and rubber pipes**, blade with cutting edge for easy penetration into the low energy material, opening and locking spring with one hand.

Die-cast magnesium body, PTFE coated blade.

For single-handed, precise cutting of pipes, also the ones with fabric reinforcement.

format professional quality Cutter for plastic and rubber pipes

Pipe cutter **for plastic and rubber pipes**, blade with pointed cutting edge for easy penetration into the low energy material, opening and locking spring with one hand. Die-cast magnesium body, PTFE coated blade.

The joint consists of a steel bearing axis with roll bearing, handle with soft cushioning inserts.

For single-handed, precise cutting of pipes, also ones with fabric reinforcement.

Also cuts soft plastic pipes, eg B. PEX, PE, PB, etc. and thin-walled plastic armored pipes.
