

Heat gun

Universal heat gun for removing varnishes and lacquers, for plastic deformations, also suitable for welding and tinning work, **total control with 1/4" display**, 10 different air flow settings, **digital adjustment** of temperature, 4 different customizable programs, temperature finely adjustable in steps / levels of 10 °C, **Constant Electronic to guarantee constant flow for long periods**, automatic thermal shutdown in the event of motor overheating, handle with soft grip on both sides, stable stationary position with non-slip rubber support.

Equipment: - 1 glass protective nozzle 75 mm - 1 nozzle for 50 mm surfaces.

Code	€	Power (W)	Power supply (V)	Operating temperature (°C)	Air flow (l/min)	Weight (Kg)
R500200005	◆	2300	230	50÷650	150÷500	0,67

Gluing gun

Hot gluing gun, for general purpose use in mountings, for repairing, fixing, filling and sealing.

2 heating elements electronically regulated for fast operational use and for a constant working temperature, mechanical feeding of the glue, possibility of wireless operation for short times, long and removable cable, interchangeable feeders, mains power connection indicator.

Equipment: - 1 removable cable, 3.5 m - 1 universal feeder - 1 feeder with large nozzle - 1 extra-long nozzle - 8 200 mm gluesticks - 1 case.

Code	€	Power (W)	Power supply (V)	Heating time (min)	Distributed glue (gr/min-1)	Glue stick ø (mm)	Max length of glue stick (mm)	Weight (Kg)
R503050005	◆	500	230	4	30	11	200	0,4
