

Roller mounting support for spindles

Roller mounting bracket for chucks.

A special two-way roller cage locks the tool holder on the flange to allow assembly and disassembly of tools and accessories on the chuck's body. The lack of contact between the chuck's cone and the bracket ensures maximum protection.

Code	€	D (mm)	H (mm)	Base (mm)	Suitable for
C659970025	◇	25	130	100	HSK25

C659970100	◇	97/100*	220	150	D 97 mm: ISO 50 DIN 2080 - SK50 / D 100 mm: HSK100 - BT50 - CAPTO C10

*When ordering, please specify:

D 97 mm for ISO 50 DIN 2080 - SK50

D 100 mm for HSK100 - BT50 - CAPTO C10.

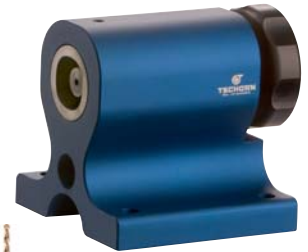

Modular mounting and dismounting support

Assembly and disassembly system of modular steel tool holders, aluminum housing, 4 swivel positions at 90°.

Application: flexible and space-saving mounting system for positive reception of all common adapter formats secure system in a few seconds without damaging the cone.

Steel adapter to be ordered separately according to the type of chuck cone.

Mounting support made of reinforced polyamide

Mounting support in polyamide reinforced with high strength fibers for high stability during installation, with 4 fixing magnets in the horizontal support.

Application: for efficient and practical assembly and disassembly, in vertical positions and horizontal, of cutting tools.

Can be mounted on any work bench.
