

Fiber disc with aluminum oxide abrasive

Vulcanized fibre disk, resined abrasive in grains of aluminum oxide (A); to be used at low pressure with good flexibility; resistant to oil, wax and grease; universal product for grinding alloyed and unalloyed steels and non-ferrous metals; for all angle grinders with rubber pad **with a max speed of 80 m / s.**

Fiber disc with aluminum oxide abrasive

Vulcanized fibre disk, resined abrasive in grains of aluminum oxide (A); to be used at low pressure with good flexibility.

An additive on the coating slows down the clogging on light metals and acts as a coolant when grinding. For grinding alloyed and unalloyed steels and non-ferrous metals; for all angle grinders with rubber pad **with a max speed of 80 m / s.**

Fiber disc with aluminum oxide abrasive

Vulcanized fibre disk, abrasive in aluminum zirconium bound resin (ZA); to be used at low pressure with good flexibility.

For grinding alloyed and unalloyed steels, stainless steel and non-ferrous metals; for all angle grinders with rubber pad **with a max speed of 80 m / s.**
