

TECHNICAL DATA SHEET

Performa NS+

Algaecide - Microbicide - Fungicide soluble in solutions

Applications

Performa NS+ is a specific preparation, soluble in water, to decontaminate degraded emulsions and waters and to prevent their pollution from bacterial micro-flora and mildew. The washing and sanitisation operations, which allow to minimise the residual microbiological load, can be performed without stopping the production cycle. Performa NS+ can also be used for the treatment in the painting booths.

Recommended concentrations:

- First treatment: 0.05 - 0.1%
 - Maintenance dose: 0.05%
- N.B.: values in volumetric percentage

Composition

- Biocides in a stabilised aqueous solution

Chemical and physical characteristics

Appearance: Liquid

Colour: Amber

Odour: Slight

pH at 20 °C: about 3 ± 0.5

Density at 20 °C: $1.3 \pm 0.5 \text{ Kg/dm}^3$

Performa NS+ is available in drums of 5 Kg.
