

TECHNICAL DATA SHEET

A300 Multifunction

All-in-one protection

It is a multifunctional product with an “all-in-one” concept that is applied thanks to its multiple features. It shows high performance in **unlocking** metals and **removing** rust; it dissolves oil residues and sludge; its **lubricating** properties are accompanied by **anti-corrosive** properties; it does not damage insulating varnish; **antioxidant**; it unlocks oxidised parts and it restores the original electrical characteristics of circuits; **water-repellent**; it is an excellent protective agent against humidity; it penetrates gaps; it expels retained humidity; **cleans and polishes** metal surfaces of any type. **Available as spray and liquid.**

APPLICATION AREAS:

Mechanical industry and nautical sector: maintenance, repair, general works, storage, transportation and electrical parts.

Automotive: nuts and bolts, clamps, hinges, guides and electrical parts.

Home: locks, hinges, doors and shutters, roller blinds and guides, trolley wheels and household appliances in general.

DIY free time: tools in general, electric tools, bicycles, motorcycles, gymnastic equipment and camping equipment.

Spray USE: apply the product in the most appropriate way. In case of applications on particularly “resistant” items, repeat the application, if necessary, and let it stand for 20-30 seconds.

Spray FEATURES

- Appearance: limpid liquid, light brown
- Odour: characteristic
- Relative density: about 0.82 gr/ml
- Water solubility: insoluble
- Lipid solubility: total
- Heavy metals: not present

Liquid USE: apply the product in the most suitable way, by dipping, brush or spray and let the product stand for a few minutes for it to penetrate the porosity of the material.

Liquid FEATURES

- Appearance: limpid liquid, light brown
- Odour: characteristic
- Relative density: about 0.82 gr/ml
- Water solubility: insoluble
- Lipid solubility: total
- Heavy metals: not present
