

TECHNICAL DATA SHEET

# **G380 Molygrease**

## ***Molybdenum disulphide grease***

**Lubricating grease with molybdenum disulphide additive** (MoS<sub>2</sub>); makes the grease resistant to extreme pressures and high temperatures; suitable **against seizures, anti-locking**; it withstands humidity, oxidation, chemical agents and high loads.

**Available as spray.**

### **APPLICATION AREAS:**

different types of **industrial** use applications, ideal for gears exposed to elements in **terrestrial, marine, agricultural environments**; suitable for lubricating power transmission equipment, generally subject to high loads and high temperatures.

### **USE:**

apply the product in the most appropriate way, let the product stand for 10-20 seconds after applying.

### **FEATURES**

- Appearance: mushy black
- Odour: characteristic
- Dropping point in °C, minimum value D-566: N.A.
- Relative density: about 0.85 gr/ml
- Water solubility: insoluble
- Lipid solubility: soluble
- Heavy metals: not present
