

TECHNICAL DATA SHEET

A310 Easy

Unlocking protective lubricant

Lubricant with unlocking and protective properties. It **dissolves** rust and facilitates **unlocking** screws and bolts; it eliminates the cohesion between surfaces and rust deposits; it **lubricates** parts and **protects** against oxidation.

Available as spray and liquid.

APPLICATION AREAS:

Mechanical industry in general, automotive spare parts, DIY: suitable for unlocking and lubricating oxidised and corroded mechanical parts.

Spray USE: apply the product on the relevant surfaces, wait accordingly to allow for appropriate penetration and then disassemble the part.

Spray FEATURES

- Appearance: limpid liquid, light brown
- Odour: characteristic
- Relative density: about 0.82 gr/ml
- Water solubility: insoluble
- Lipid solubility: totally soluble
- Heavy metals: not present

Liquid USE: apply the product on the relevant surfaces, in the most appropriate way, wait accordingly to allow for appropriate penetration and then disassemble the part.

Liquid FEATURES

- Appearance: limpid liquid, light brown
- Odour: characteristic
- Relative density: about 0.82 gr/ml
- Water solubility: insoluble
- Lipid solubility: totally soluble
- Heavy metals: not present
