

TECHNICAL DATA SHEET

# ***G300 Unigrease***

## ***Multipurpose grease***

Multipurpose grease with excellent **adhesive** properties for works at high speed; **antioxidant**; it protects worked components from oxidation for a long time; **anticorrosive**; the strong penetration action ensures durable lubrication of the worked parts.

**Available as spray.**

### **APPLICATION AREAS:**

mechanical workshops in general, automotive spare parts, for general maintenance, different types of industrial use applications; suitable to lubricate/grease bearings, power transmission equipment in general, articulated arms, metal chains, pivots, and so on.

### **USE:**

apply the product in the most appropriate way.

### **FEATURES**

- Appearance: straw-coloured, mushy
- Odour: characteristic
- Dropping point in °C, 450°C ASTM D-566: N.A.
- Flash point: below 0°C
- Relative density: about 0.85 gr/ml
- Water solubility: insoluble
- Lipid solubility: soluble
- Heavy metals: not present
