

TECHNICAL DATA SHEET

# ***L650 Chain Lub***

## ***Chain lubricant***

**Lubricant** for metal chains, stringy with high **adhesive power** and resistant to high pressures; the high **viscosity** guarantees the sliding of chains and bearings subject to high performance; it ensures durable lubrication and protects from **wear** and **oxidation**, **resistant to salt water** and **temperature swings**. During dispensing, the product penetrates the chain links, lubricating the internal rollers too. **It does NOT damage** rubber or plastic parts.

**Available as spray.**

**APPLICATION AREAS:**

for motion chains, gear and distribution chains, rims, pinions, open gears and mechanical moving parts.

**USE:**

apply the product on the relevant surfaces in the most appropriate way.

**FEATURES**

- Appearance: limpid, straw-coloured liquid
- Odour: characteristic
- Flash point: below 0°C
- Relative density: about 0.90 gr/ml
- Water solubility: insoluble
- Lipid solubility: soluble
- Heavy metals: not present
